

General Terms:

1. A Purchase Order is required for all items to be shipped. This form must list the jobsite address and detail of items being purchased, including crating and shipping charges. This information is required by Tedder Stone and will help us comply with current DOT and insurance regulations. Additionally our Project Information form must be completed and sent back to Tedderstone for every project by the Contractor.
2. Tedder Stone must receive an itemized list of each radius in lineal feet submitted by the Contractor or Architect in order to obtain an estimate on material. The smallest amount we can ship is 25 stones or 50 stones Internationally. Typical lead-time on a medium sized project (approximately 75 stones) is five weeks. Please allow an additional week for transit time in the continental US. Tedder Stone manufactures many radiuses but it is unlikely we have your exact project in stock due to the ever-changing popularity of certain styles of parks and bowls. Please give as much lead-time as possible.
3. It is the Contractor's responsibility to order the correct radiuses and amount of material needed for the project. Tedder Stone recommends ordering extra replacements to cover improper installation, vandalism, or normal wear and tear. Tedder Stone cannot always immediately ship additional coping to cover unexpected needs.
4. It is the Architect's responsibility to provide the Contractor with plans and specifications so that they can estimate and install coping for the project. It is the Architect's responsibility to notify Tedder Stone if third party bidders will be bidding on plans when Tedder Stone coping has been specified in the drawings. The Contractor and or Architect must submit a deadline for when material will be needed.
5. It is the Contractor's responsibility to measure, install and seal coping to industry specifications with direction or oversight from the Architect.
6. Freight shipments must be inspected upon receipt. If any damage is found, the shipment must be signed for as "DAMAGED" on the freight company BOL by the appointed recipient. If freight is found to be damaged after the freight

company has left (CONCELED DAMAGE) a reversal of signature must be made by calling the phone number on the freight receipt. Tedder Stone will not make any allowances for damaged freight unless signed for as "DAMAGED". Tedder Stone will not make any allowances for damaged freight reported to Tedder Stone after 48 hours from shipment delivery.

7. It is the Contractor's responsibility to inspect all material before beginning installation. The contractor must notify Tedder Stone immediately if material is unacceptable. Tedder Stone will not be liable for or recognize any claims made after the start of installation of any material that wasn't inspected upon receipt of delivery. We will not make any allowances for labor claims, for replacement or any other charges once material is installed.
8. Tedder Stone is always available to answer any installation questions or comments. We appreciate your business. Let's build the best skateparks together.
